

BORN IN AUSTRALIA, the home of swimming,  
Zoggs is now swimming all around the world.

At Zoggs we have a passion for creating  
innovative, exciting and high quality Swimwear  
and Swim Equipment.

We want all swimmers, whether just starting out;  
swimming for fitness or recreation; swimming in  
the great outdoors or in a Triathlon, to enjoy the  
freedom, fun and exhilaration  
of the water.

What matters to us is that swimmers enjoy life in  
the fun lane with unconditional trust in their Zoggs  
Swimwear, Goggles and Equipment.

# Lenses

## Photochromatic

Photochromatic lenses react to the sun's rays and tint according to the light conditions.

## Polarized Ultra

Polarized lenses reduce glare and the reflections of the sun so are ideal for high level light and especially in direct sunshine. Zoggs Ultra lenses go further than most also repelling blue light.

## Polarized

Smoke polarized lenses, ideal for high level light and especially in direct sunshine, reducing glare and reflections of the sun.

## Curved Lens Technology - CLT

CLT offers the swimmer 180 degrees peripheral vision and crystal clear clarity. Ideal for swimming in a crowd, or with others in your lane.

## UV Protection

Zoggs includes UV protection as a standard feature on all goggles. As well as our standard UV360, we have introduced UV400 maximum protection which blocks 99%-100% of the sun's harmful UV rays, to ensure swimming is as safe as it is enjoyable.

## Anti-Fog Fogbuster™

Fogbuster offers extra moisture control for real clarity of vision, and a stress free swim.

## CV Clearer Vision

Amplify light in low level conditions and reduce the sun's glare providing excellent clarity and vision.

This indicates the style has been sanctioned for use at FINA approved events.

## Titanium Reactor

Photo-chromatic lenses react to the sun's rays and tint according to the light conditions. The Titanium coating provides added protection from reflected light reducing glare and improving visibility both outdoors as well as indoors.

## Titanium

Added protection from reflected light to reduce eye fatigue. Reduces glare and softens the visual experience when swimming inside.

## Polarized Ultra

Copper polarized lenses filters blue light and are ideal for high level light especially in direct sunshine to cut out glare and reflected light.

## Polarized

Smoke polarized lenses, ideal for high level light and especially in direct sunshine, reducing glare and reflections of the sun.

## Mirrored

Ideal for direct sunshine and bright conditions, reducing glare and reflections of the sun, perfect for swimming outside.

## CV Clearer Vision

Ideal for both high and low level light, amplifying light in low level conditions and reducing the sun's glare, providing excellent clarity and vision.

## Colour Tinted

Designed to offer medium protection against the sun and bright indoor light, creating the perfect indoor lens.

## Smoke Tinted

Designed to offer medium protection against the sun and bright light making it ideal for outdoor use. A practical solution for changeable conditions and everyday training.

## Clear

Ideal for low light, overcast conditions or indoor where maximum visibility is required providing excellent clarity.

## Frames & Gaskets

### Ultra Fit

Ultra-fit is the latest, exclusive and very best designed gasket, which gives the swimmer the very best fit and ultimate comfort. The patented design applied to Predator has been developed to give the lightest and most comfortable goggle in the world. The contoured J-gasket allows less pressure around the eye socket for the 'almost not there' feel, and is 15% lighter than the previous Predator model.

### Air Cushion

Air filled gaskets, made from high quality silicone, provide a 'cushioned' seal which gives an 'almost not there' fit with significantly reduced marking around the eye.

### Soft-Seal+

Our unique hypo-allergenic Soft-Seal+ liquid silicone gaskets for an ultra light face contouring second skin fit and comfort. Made from hypo allergenic liquid silicone.

### Soft-Seal

Our unique hypo-allergenic Soft-Seal fit moulds to the contours of the swimmer's face, giving a superb customised fit whilst retaining softness to give a 'second skin' style comfort. Made of thermoplastic rubber.

### 4 Flexpoint

Ultimate frame technology, for enhanced frame flexibility offering a super comfortable fit for all faces.

### Wiro Frame

Unique bio-tech frame technology, a durable long lasting frame with soft silicone gaskets offering a super comfortable fit.

### Smaller Frames

Particular models are available in a smaller frame size to fit those with smaller faces, notably in our womens range.

## Straps

### Split Yoke

Our split yoke straps, made using high quality silicone, are strong, durable and comfortable, featured on many of our goggles.

### Double Band

Our double band headstraps also feature an easy adjust system, made using high quality silicone for comfort and durability.

### Quick Adjust

Our quick adjust system is fast and secure, the easiest way to get just the right fit.

### Slide Adjust

Side slide adjust clip featured on entry level goggles.

### Easy Adjust

Easy adjust for a secure and comfortable fit.

### Pulley Adjust System

New pulley system exclusive to Predator for a secure and even fit.

## Key

### EMEA Exclusive

This indicates the style is exclusive to markets in EMEA.

### Performance

This indicates the style is a performance goggle.

### Fitness

This indicates the style is a fitness goggle.

### Womens

This indicates the style is a womens goggle.
